Profile

- Full-stack web developer looking to apply my skills and diverse experience in a software engineering role
- 4+ years' experience in web development, digital marketing, and public relations in both the US and Korea
- Permanent Resident; eligible to work in the US without visa sponsorship

Skills

Front-end: JavaScript, ReactJS, Redux, CSS, Sass

Tools: Git, Loopback, Webpack, Mocha/Chai, CircleCI

Back-end: NodeJS, Express, MySQL, MongoDB

Languages: English (Fluent), Korean (Native)

Work

Web Development Intern

Sep 2019 - Dec 2019

San Diego Code School, San Diego

- Rebuilt the official website and student management system using ReactJS; increased performance by 3 times
- Improved marketing aspects of the site by implementing SEO; enhanced the UI/UX using SASS
- Cooperated with developers using agile and Mob methods with Gitflow; performed QA testing using Mocha/Chai

Marketing Specialist

Nov 2016 - Mar 2019

Wilo Korea, Seoul

- Created a new e-commerce platform from scratch and developed digital marketing and CRM strategies
- Managed media public relations with and proactively created a corporate standard crisis management manual
- Conducted B2B marketing, including customer events, advertising, and seminars

Public Relations Intern

Aug 2014 - Aug 2015

NSIP Law, Washington D.C.

- Sponsored via a US-Korean government program; successfully handled daily PR and administrative tasks
- Took charge of research and designing while collaborating with web developers to build and manage a website

Projects

[Wild Flag](#)

- Web application that creates a secure and centralized portal for NGOs to check others' projects
- Built with ReactJS, MySQL, NodeJS, Passport.js, HTML, CSS and bcrypt

[Lunchify](#)

- GET routes and axios requests to store random food pictures; created functions to fetch data from the back-end and wire-framed the front-end to display meal and drink menus
- Built with ReactJS, Express, HTML, CSS, and Pixabay API
